www.insteon.com/onoffoutlet

Featuring integrated control of the upper outlet, Insteon Dimmer Outlet gives you remote dimming and control of the upper outlet and always-on convenience with the lower outlet.

Invisible Control

Say goodbye to bulky remote control modules - with the Dimmer Outlet, everything you need for remote control is built-in and completely invisible for a clean, elegant look.

Individual Control

The bottom outlet is always on. Whether you need an outlet in the hallway for the vacuum, or an outlet behind the living room couch for an Insteon tabletop controller, you'll never have to worry about the outlet being switched off.

Tamper Resistant

Automation shouldn't place your family in jeopardy. That's why On/Off Outlet features tamper resistant receptacles, preventing your young ones from possible accidental electric shock.

Limitless Control Options

There's never been a more flexible outlet when it comes to remote control. Control directly at the outlet, use any Insteon device or even your smartphone with the Insteon Hub.
